KINDALEM TAZEB BELETE

Full-Stack Laravel & Vue.js Developer

Debark, Ethiopia | GitHub: kindalemtazeb-ops | LinkedIn: kindalem-tazeb-dev | Telegram: @kindalemtazeb

PROFESSIONAL SUMMARY

Results-driven Full-Stack Laravel & Vue.js Developer and Computer Science student at Debark University with hands-on expertise in architecting and deploying scalable web applications, multi-vendor e-commerce platforms (HabeshaCart), and fintech solutions (ADWA BANK). Specialized in PHP, Laravel, Vue.js, MySQL, and Tailwind CSS, with a strong focus on clean UI/UX implementation, secure role-based access control (RBAC), and robust backend workflows.

TECHNICAL SKILLS

- **Backend:** PHP, Laravel, RESTful APIs, OOP, MySQL
- **Frontend:** HTML5, CSS3, Tailwind CSS, JavaScript, Vue.js, Alpine.js
- **Tools & Environment:** Git, GitHub, VS Code, XAMPP, Composer, Postman

FEATURED PROJECTS

- **HabeshaCart (Multi-Vendor E-commerce Marketplace)**
  - Engineered a full-scale enterprise-grade multi-vendor e-commerce platform utilizing Laravel, MySQL, and Tailwind CSS.
  - Implemented advanced Role-Based Access Control (RBAC) for Admins, Vendors, and Customers, alongside secure product publishing and inventory workflows.
  - Integrated multi-image product management, automated email verification systems, and simulated local payment gateways (Telebirr, CBE Birr).
- **ADWA BANK (Web Banking & Financial Management System)**
  - Developed a comprehensive full-stack banking application featuring account creation, secure deposits, withdrawals, and real-time inter-account fund transfers.
  - Implemented custom receipt generation handling customer photos and simulated USSD transaction workflows.
- **Student Registration System**
  - Built a scalable web-based Student Registration and Information Management System using PHP and Laravel, providing end-to-end management for student enrollment and academic records.

EDUCATION

- **B.Sc. in Computer Science (3rd Year Student)**
  Debark University, Ethiopia (Expected Graduation: Jul 2028)
